

Anthony Outland is the Sr. Manager of Global Offerings for Honeywell Building Technology based in Atlanta, GA. He and his team are responsible for developing and launching Honeywell's Integrated Solutions for Fire, Security, and Building Management Systems in seven regions around the globe aligned with key vertical markets. Solutions from his \$1.3 Billion dollar portfolio can be found in almost every commercial building around the globe ranging from Airports, Hospitals, Hospitality, Sports Venues, Residential, Industrial and others. He has been at Honeywell since 2019 and is also the Vice Chair of Honeywell's Black Employee Network (HBEEN) when he is responsible for recruiting, developing and retaining diverse talent and fostering a healthy environment for all employees.

Anthony began his career over 22 years ago in the automotive industry where he introduced and launched Nissan's Infiniti first onboard navigation system to the North American Market. This involved design, testing and certification of this product on the North American diverse road network. He continued his experience in the automotive industry where he developed and launched Ford's 2nd Generation Family Entertainment System. He took this solution through every phase of the product development lifecycle along with forming strategic partnerships with key technology partners to deliver this to high-volume vehicle lines.
